### January 5, 2021 Property Manager's Report

The final playground colors were selected and the payment was sent to purchase the playground. We received an additional 2% discount for paying for the equipment in full which saved us \$1,800 that we can use towards needed tree removals.

With the payment-in-full discount, the total for the playground came to \$182,560. This reflects the deletion of the chimes and the inclusion of the 6M rope climber and the 30 M zip line and additional fencing and mulch for the larger area.

I will have a schedule for delivery and installation sometime early in January 2021. Once I have the schedule for installation, I will apply for the tree removal permit and once obtained have the trees removed to accommodate the new equipment placement.

The electrical work for the pond aeration and pond fountain is underway. The pond fountain will hopefully be installed on Wednesday, December 23, 2020. The pond aerators should be installed in early January. The electrical work for the 3 large lake aerators will start in early January.

I received comments on the park restroom building permit and made the requested changes and added the additional requested information. I returned the file to the general contractor who resubmitted the drawings addressing Hillsborough County's comments on December 23, 2020

I received word that we received the Department of Environmental Protection's grant for \$524,000. Shortly after the first of the year, we should receive direction on completing their requested information such as project plans etc. I did confirm that invoices are to be paid by us and submitted to DEP for reimbursement. They indicated to me that reimbursement is usually performed between 7 to 14 days. I will need to advise them of our plans to aerate the big lake and get approval from them before proceeding as it may skew the data they want to obtain. If they do not want the traditional aeration I think we should complete the required electrical work and postpone the purchase and installation of the large lake aerators until next year if possible. One issue with the grant is that DEP is short funded this year and if a red tide causes a fish kill that needs cleanup that clean-up has to be funded from the grant pool of money. They are currently watching a red tide event off the coast of South West Florida but think that the cold weather will dissipate the algae bloom. We should be notified for certain either way in early January 2021.

I have yet to get back to the drawings for the park gate permits but will do so after I return on January 4<sup>th</sup>. I think it is probably good that we do not submit for the gate permits until the restroom permit is obtained as it may cause issues with the restroom permit. Particularly as they are looking at the parking, handicapped parking and the accessible route to the restroom building as part of the restroom permit.
